A history of leadership

Konkuk University has begun its great journey toward a new epoch. It has taken a big step toward the future of “Konkuk’s Centennial” based on its long-standing tradition and philosophy in conjunction with ceaseless change and innovation.
Since its foundation, Konkuk University has fulfilled its role as an institution that contributes to national and social development under the virtues of sincerity, fidelity, and righteousness by fostering talent who take the lead in the construction of a true welfare nation.

Konkuk University was established as a junior college in 1946 by Dr. Yoo Seok-chang, who founded Central Clinic of the Community in 1931 to spread the spirit of providing decent medical care to underprivileged Koreans. Since its establishment, KU has preserved its splendid tradition of being one of the most powerful national private schools.

Based on such a proud history, we at the Konkuk University Foundation have enhanced our overall capacity and proposed a groundbreaking paradigm of private school management to open a new era full of brighter and hopeful glory on KU campus. To that end, we have passionately carried out grand-scale infrastructure building projects, including the Starcity development project, since the beginning of the 21st century.

Keeping pace with tremendous efforts made by the Konkuk University Foundation setting a new milestone for development of the university, I will endeavor to constantly interact with all faculty and staff members so that Konkuk University will become the university contributing to humankind by concentrating individual efforts, energy and vitality and accelerating the development.

We will make KU even greater based on internal sustainability and harmony.

Chairperson of the Konkuk University Foundation  Yoo Jaeun
Over the last 70 years, Konkuk University has been continuously achieving remarkable growth and development in line with dynamic changes in the Republic of Korea. Konkuk University has been reaffirming its status as the pioneering university offering a blueprint for the future of higher education by being chosen to be funded through large-scale national projects, including the PRogram for Industry needs-Matched Education (PRIME), the Leader in Industry-University Cooperation project (LINC+), the Software (SW)-Oriented University Project, the Next-Generation Engineer project, and the Basic Lab Support project.

To cope with rapidly changing times and demands, we at Konkuk University will never stop evolution and development by devising a reasonable and innovative university management system, focusing on support for pioneering studies, strengthening the relations with partner universities and foreign institutes and providing student-centered education for nurturing global talent. To become "a university that builds the nation and embraces the world", we will share our intellectual and cultural property with our community and carry out our social responsibilities and roles. We will continue to transform and innovate ourselves for the future of Korea and mankind. I would like to ask for your continued interest in our monumental challenges.

President  Sanggi Min

We foster capable persons equipped with knowledge and skills needed in contemporary society through student-oriented educational innovation.
Dr. Yoo Seok-chang, the founder of Konkuk University, is one of the 13 private school founders in the history of 100 years of Korea’s modern private schools. He was a true intellectual who had a strong conviction of restoring the deprived sovereignty, and building a welfare and cultural nation. As seen in his pen name “Sanghuh,” which means always thinking of the country first and emptying one’s mind for the prosperity of the country, he devoted his entire life to his country.

After graduating from Gyeongseong Medical College in 1928, he began his medical career for people. Specifically, he founded Central Clinic of the Community in 1931 to provide modern medical care to people suffering from poverty and disease. Immediately after liberation, he opened a private school named “Geonguk Uisuk” in the Seobuk-Hakhoe Building (currently Konkuk University Museum) located in Nakwon-dong to foster capable persons essential to rebuilding the nation. The noble life and philosophy of Dr. Yoo Seok-chang—who spent his life as a national pioneer, an educator involved in the opening of a new history of Korea’s private schools, and a real physician for people—have been the foundation and the biggest driving force for the existence of today’s Konkuk University and Konkuk University Medical Center.

From the university built for the nation to the university playing a central role in the world

**EDUCATIONAL GOALS**

**Sincerity**

Sincerity means truth and devotion; this is where all things begin and end. Cultivation of healthy love and personality

**Fidelity**

Fidelity is the basis of social life; all solidarity and cooperation come from this. Academic studies of profound theories and application methods

**Righteousness**

Righteousness indicates justice and courage; all the achievements of those recognized long in history are records of righteousness.

Contribution to the progress of human societies by fostering persons of talent as pillars of the nation
Preparing for “Konkuk’s Centennial” by balancing tradition and innovation

### 1930-1969

**1931**
- Founded Central Clinic of the Community

**1935**
- Revealed Central Clinic of the Community in Public Hospital of the Community

**1948**
- Opened Choon-chun School of Politics

**1949**
- Received an approval for the foundation of Choon-chun College of Politics and Choon-chun College of Politics

**1950-1969**
- Received an approval for the foundation of School of Politics and College of Politics

**1969**
- Completed the construction of the stadium

**1969. 06**
- Reorganized as 113 Reserve Officers Training Corps (ROTC)

**1960-1997**
- Received an approval for the launching of night class

**1967. 12**
- Established Konkuk University Middle School

**1970-1999**

**1971. 01**
- Dr. Kwon jae-in inaugurated as the 15th president

**1971. 05**
- Set up the statue

**1972. 01**
- Dr. Sook-chang, the founder of Konkuk University, passed away (11 years)

**1975. 09**
- Opened the College of Medicine of Chungju Campus

**1975. 05**
- Relocated Seoul International School in Seoul

**1973. 06**
- Received an approval for Seoul International School

**1973. 09**
- Opened Seoul International School

**1978. 03**
- Completed the construction of the university

**1982. 10**
- Completed the Liberal Arts Building and the Humanities and Social Science Center

**1984. 01**
- Completed the Natural Science Building of the College of Agriculture

**1988. 10**
- Installed stone tablets that bear the inscriptions of major literary works around the College of Medicine of Chungju Campus

**1989. 03**
- Completed Sanghuh Memorial Library; constructed the new Heavy Machinery Liberal Arts Faculty Building

**1989. 12**
- Relocated and completed the greenhouse

**1990. 08**
- Dr. Kim Yong-han inaugurated as the 13th president

**1990. 05**
- Completed the laboratory and control office

**1991. 05**
- Completed the sculpture of the main gate

**1991. 01**
- Extended the College of Animal Husbandry into Star City (quasi-residential area)

**1992. 05**
- Completed the Mosirae Building, a dormitory

**1992. 01**
- Ms. Kim Kyung-hee inaugurated as the 14th president

**1993. 02**
- Dr. Jeong Ho-gwon inaugurated as the 15th president

**1993. 12**
- Mr. Yoo Il-yun inaugurated as the chairperson of University Foundation

**1994. 01**
- Completed the arts campus building for athletics

**1995. 05**
- Completed the Mosirae Building B, a dormitory

**1995. 06**
- Completed the College of Animal Husbandry

**1996. 01**
- Completed a dormitory in Singwan building

**1997. 01**
- Extended Mosirae Building B, a dormitory

**1997. 05**
- Completed the Cheson Culture Foundation

**1997. 06**
- Completed the 2nd Student Union Building

**1998. 05**
- Completed the renovation of the outdoor theater of Chungju Campus

**1999. 11**
- Opened a new Konkuk University hospital

**2000-2017**

**2000. 08**
- Constructed the New Millennium Hall and the Liberal Arts Faculty Building

**2003. 08**
- Completed the Global Hall, a residence exclusive to foreigners

**2006. 05**
- Extended the building of the College of Veterinary Medicine

**2007. 01**
- Completed the Star City buildings for sales

**2008. 03**
- Completed the Business Incubation Center

**2009. 07**
- Completed the InnoStar Research Center

**2010. 04**
- Completed the Global Hall and the Humanities and Social Science Center

**2010. 05**
- Completed the College of Business Incubation Center

**2011. 04**
- Completed the College of Veterinary Medicine

**2012. 11**
- Completed the Business Incubation Center

**2013. 10**
- Completed the Innovation Building

**2014. 08**
- Completed the New Millennium Hall and the Liberal Arts Faculty Building

**2015. 05**
- Completed the College of Business Incubation Center

**2016. 09**
- Dr. Min Sang-gi inaugurated as the 19th president

**2017. 05**
- Yoo Ja-eun inaugurated as the 26th president
Konkuk University Foundation
It stands tall because of its sound financial footing.

The total assets of the Konkuk University Foundation have increased by 1,557.5 million USD the last 15 years. The total assets of Konkuk University Foundation have exceeded 2,241.5 million USD. This is a sea change compared to the total amount of its assets, which stood at 702.1 million USD as of 2001. Since 2001, KU Foundation has aggressively promoted the development project for the university’s southern site called Star City Project, through which the existing sites used as baseball and soccer fields have been changed into a high-rise residential building, a department store, a shopping center, and the Senior Tower. As a result, its total assets have successfully increased by 3.2 times.

The overall size of balancing accounts of its profit-making businesses and educational establishments centered on Konkuk University such as Konkuk University Medical Center, Konkuk University Chungju Hospital, Konkuk Dairy & Haem Industry, The Classic 500, Konkuk AMC, Smart KU Golf Pavilion, affiliated middle and high schools, and more significantly increased from 302.3 million USD in 2001 to 1,043.9 million USD in 2016. Furthermore, there are only 130 companies in Korea that can achieve sales worth 934.0 million USD or more. Thanks to this achievement, the total amount funded by KU Foundation reached 51.3 million USD between 2011 and 2016, which means that an average of 8.6 million USD is annually granted to the university to support educational projects such as expanding state-of-the-art educational facilities, and recruiting more erudite faculty and staff.
KU Foundation’s solid financial footing serves as a stepping stone for innovation of higher education

With total assets of 2,259.5 million USD and 6,450 staff members and faculty, KU Foundation’s sound financial footing plays a significant role in development of the university. To obtain finance needed for developing the university, the KU Foundation has undertaken and run an array of profitable projects such as the Starcity development project through which the university could bring in revenue and change Seoul through development of the region. By managing the finance of the university successfully, The KU Foundation has given full support to growth of the university by investing in educational facilities and hiring top-notch faculty.
Konkuk’s Centennial,  
The beginning of educational innovation for the future

PRIME KONKUK 2020  
“A history of leadership”

To become One of the Top 5 Private Universities in Korea and One of the Top 100 Universities in Asia

Priority management areas and the keyword of the goal

**Priority management areas**

- Education
- Industry-university cooperation
- Management
- Research
- Reputation
- Globalization

**Keyword of the goal**

- Satisfaction
- Innovation
- Efficiency
- Environmental adaptability
- Technological leadership
- Superb talent
- Global reputation
- Quality

**Potential for change**

- Self-assessment
Konkuk continues to improve academic achievement with pride

Selected for the Program for Industrial Needs-Matched Education project
PRIME
2016–2018, Ministry of Education

Selected for the Leaders in Industry–University Cooperation (LINC+) program
LINC+
2017–2022, Ministry of Education

Selected for the Leaders of Start-up Supporting Program
2014–2018, Ministry of SMEs and Startups

Selected for the BK21 PLUS (Brain Korea 21 PLUS Program)
BK21
2013–2020, Ministry of Education

Selected for the Software-Oriented University project
2018–2021, Ministry of Science and ICT

Selected for the 2017 Basic Research Laboratory(BRL) project
BRL
2017–2020, Ministry of Science, ICT and Future Planning / National Research Foundation of Korea

Selected for the Industry Professional Practice (IPP) project
IPP
2016–2018, Ministry of Education

Selected for the Support Project for University Contributing to the Normalization of High School Education
2007–2017, Ministry of Education

Ranked 5th in humanities according to the Korea JeongAng Daily University Evaluation
Korea JeongAng Daily in 2017

Ranked as the 7th university according to Korea Top 10 Brands
Families in 2017

Ranked 10th in terms of producing CEOs of top 500 companies
CEO Score in 2015

Ranked 10th in terms of producing senior government officials
Ministry of Finance and Safety in 2014

Ranked 12th in Korea in the Times Higher Education (THE) World University Rankings
Times Higher Education in 2017

Selected as Asia’s most innovative university
Thomson Reuters in 2016–2017

Ranked 10th in terms of producing
Number of patent applications in the food bio area

Start-up education rate
Korea JeongAng Daily in 2017

Number of students who passed the Korean National Veterinary Licensing Examination
Animal, Plant, and Fisheries Quarantine and Inspection Agency in 2018

Number of university students who passed the Korean National Veterinary Licensing Examination
Animal, Plant, and Fisheries Quarantine and Inspection Agency in 2018

Accredited as the best for education on business administration by KABEA

Rated as Class A through the Universities Reorganization Evaluation by the Ministry of Education
2015

The College of Education rated as Class A by the Evaluation of Teacher Education Institutions
2014

All applicants passed the Korean National Veterinary Licensing Examination
Top position in 2016 and 2018

All applicants passed the Korean National Medical Licensing Examination
2015

100%
Practical interdisciplinary education to lead the 4th Industrial Revolution

Konkuk University, which has been chosen for the PRogram for Industrial needs–Matched Education (PRIME) hosted by the Ministry of Education, has led educational changes by expanding and reorganizing its academic structure into new industries as well as promising disciplines in the future. Specifically, it launched the “Konkuk Institute of Science and Technology (KIT)” to strengthen the competitiveness of biotechnology and ICT-convergence engineering, and the “PRIME Humanities Group,” which focuses on setting up interdisciplinary programs such as Human ICT, Global MICE, and Humanities Counseling and Healing to develop customized education systems. Moreover, as a participant in the BK21 PLUS that will run until 2020, it has exerted great efforts to foster creative talents for the future.

Self-designed Dream semester system

As one of Konkuk University’s newly introduced programs, the “Dream Semester System” is centered on on-the-job experiences, through which students can be credited by carrying out self-directed creative activities instead of completing classes. Free from the existing formulaic school systems, this allows students to design their projects and supports them by establishing the corresponding programs as regular subjects so that they can find and explore disciplines that they want to study and challenge for themselves. Students can earn from 3 to 12 credits through the Dream Semester System, through which they can set the direction of their career and build confidence in themselves.

FIT Education System, a new paradigm of education

Konkuk University has been striving to reinforce career education by resolutely carrying out educational innovation to cultivate “WE (wein),” the creative and future-oriented talents who value the community and organization above all other things. Based on the “Convergence-Module Cluster” and the “PLUS Semester System,” the “FIT Education System” is operated to suggest a new paradigm for the curriculum that gratifies industrial demands, the needs of students and companies, and global changes. Furthermore, this system supports instructional processes that proceed based on students’ active participation through discussions and debates, which can consequently enhance their capacity for creativity and synthetic thinking.

Konkuk cultivates creative talent through an interdisciplinary approach.

The solutions to discover talents suitable for the society in this era lie in the education of Konkuk University. Konkuk University, which has been at the forefront of a paradigm shift of higher education, has been cultivating convergence-based creative talents who will lead the Fourth Industrial Revolution through ceaseless changes and innovation.
Konkuk creates the future of mankind through its world-class research and industry-university cooperation.

Konkuk takes into consideration the future of humans and industries through its world-class research. We at Konkuk dream of the era of the humane Fourth Industrial Revolution, where universities and communities live in harmony. Konkuk’s convergence-based industry-university cooperation creates a new tomorrow for humans.

Pioneering studies to lead the 4th Industrial Revolution
Konkuk University has been leading the way to exploring disciplines and developing new technologies for which demands are expected to increase in the era of the Fourth Industrial Revolution. Specifically, it has secured a future driving force through a wide range of studies in cooperation with professional companies, the pivot of the way, in such different fields as artificial intelligence, cloud computing, big data, biotechnology, aerospace, and environmental technology. Currently, its research teams—such as the Konkuk Aerospace Design / Airworthiness Research Institute, Artificial Intelligence Cloud Computing Center, Center for International Climate and Environmental Research, and Humanized Pig Research Center—are devoted to joint R&D through industry-university research cooperation.

Quality enhancement of faculty research support systems
Konkuk University, oriented toward becoming a global research-centered university, has further strengthened internal research funding systems to provide more benefits to researchers who have steadily accumulated actual research achievements. Taking into account excellent papers highly cited in industry-university cooperation and studies, we are planning to reorganize the internal research funding systems in order to expand rewards to qualitatively remarkable research achievements. In addition, we will be equipped with research competitiveness that will lead the future of humans through a variety of industry-university studies.

LING+ for the win-win growth of universities and communities
Since selected for the community-customized Industry–University Cooperation (LING+) program, Konkuk University has accelerated innovation in higher education toward the future, which was designed to carry out its social obligation, help students enhance their competence in employment and start-up, and foster practical research. Aiming at the win-win growth of the university and its communities, it performs its role as a hub of win-win industry-university cooperation centered on its strength, biotechnology, through close networks between its Seoul Campus and GLOCAL Campus. In addition, we at Konkuk University will not spare our efforts to foster professionals for future new industries by establishing the College of Healing Biotechnology.

Amount of research contracts received
2014–2016
78 million USD

Education systems based on students’ participation

Konkuk University has promoted the globalization of its campus as its top priority to cultivate global talents and increase its competitiveness. To achieve that goal, it provides agro-livestock processing/market-ing educational programs for public officials from developing countries, such as Myanmar and Mongolia, in cooperation with the Korea International Cooperation Agency (KOICA) by utilizing its qualified educational assets. Recently, it has worked on the Living Lab project, a global industry–university cooperation program intended to research social issues with undergraduates from the Netherlands. Through all of these efforts, Konkuk University is recognized as a leader in globalization.

Conclusion of exchange agreements with world-renowned universities

The exchange agreements with overseas partner universities that Konkuk have concluded are for providing more diverse opportunities for Konkuk students to grow as global leaders. Currently, such curricula as the Exchange Student Program, dual degree system, international internship program, and language training program are jointly in operation through a wide range of exchanges with 481 universities and research centers from 60 countries. Recently, along with the increasing number of exchange students from Europe, such as from the United Kingdom and France, as well as from the United States, outstanding persons of talent from all over the world are pursuing knowledge in Konkuk University, and a number of Konkuk students are sent to every corner of the world.

Programs to cultivate global talents

Facing the globalization trend, Konkuk University operates various global programs for its students to develop world-class competitiveness and leadership. The KU New Frontier, one of its representative overseas exploration programs, provides opportunities for students to broaden their horizons on overseas cultures, thus growing as future-oriented persons equipped with a globally competitive and progressive spirit. Another program is the ALP Chinese Immersion Program, which requires students to visit the Shanghai University of Finance and Economics in China and take a six-week intensive Chinese learning course. Participants are quite satisfied with its remarkable learning effect.

Konkuk fosters global leaders who keep up and communicate with the world.

Konkuk has made efforts to stand tall as a global prestigious university in the age of globalization until now. We see an infinite potential for tomorrow from Konkuk students traveling across the world and broadening their horizons.
Creating synergistic effects through industry–university research cooperation
Konkuk University launched the KU Commission for Creative Employment Opportunities and the KU Creative Employment Center after it was selected for the Career Development Center for Creative Economy operation project implemented by the government in 2016. The Creative Employment Center provides one-stop employment support services through the employment support cluster, and furnishes local young people as well as KU students with jobs and benefits based on cooperation among the Ministry of Employment and Labor, the local government, and Konkuk University.

Cultivating capable persons equipped with practical ability tailored to social needs
Since selected as the operator of the Senior College IPP-Type Work-Learning Dual System by the Ministry of Employment and Labor, Konkuk University has run the Industry Professional Practice (IPP) Center to support students in their junior and senior years in receiving systematic on-the-job training from companies related to their majors. In addition, it strengthens work-based practical competence through creative design-oriented subjects, business practice–linked subjects, and long-term field placements in conjunction with the renovation of its undergraduate programs. In addition, Konkuk University operates the professional consultant system by major and college to improve students’ competence in employment.

Suggesting the successful models of a K-Startup university
Since chosen for the K-Startup project in 2014, Konkuk University has actively carried out start-up education and start-up funding support, which target KU students and the general public, and the Campus CEO Cultivation project. Since it launched the KU Startup Scholarship program in 2015, it has aggressively supported KU students’ start-up activities. Moreover, it puts efforts into discovering and nurturing competitive young start-ups through the Campus Startup project with Korea Credit Guarantee Fund—for example, supporting customized sponsorship and investment to start-ups that have exceptional ideas and technical power.

Konkuk nurtures future talent possessing skills needed for employment and start-up.
From future talents who meet the changes of this age and are good at practical business tailored to social needs to start-ups who seek a new potential with their brilliant ideas Konkuk is dedicated to increasing professionalism and efficiency to support students’ careers and dreams.

Konkuk nurtures future talent possessing skills needed for employment and start-up.
From future talents who meet the changes of this age and are good at practical business tailored to social needs to start-ups who seek a new potential with their brilliant ideas Konkuk is dedicated to increasing professionalism and efficiency to support students’ careers and dreams.
Konkuk University operates different volunteer work programs because it is aware that the way to realizing its social responsibilities is to foster warmhearted people of talent who love and consider their neighbors. It is at the forefront of donating and sharing talents in different fields—such as medicine, art, economy, and science—and realizing a warmhearted community in addition to the operation of KUmbrella volunteers composed of students, faculty members, and staff members, and the global volunteer group called Konkuk University Volunteers designed to build housing and exchange cultures along with education.

Konkuk University additionally launches and operates public service curricula for the specific purpose of actualizing the virtues of KU’s foundation philosophy—sincerity, fidelity, and righteousness—providing whole-person education, cultivating a mind that is appropriate for communal life, and making a contribution to the community. Regardless of school years and departments (majors), these curricula are performed by targeting all students and help them be reborn as genuine intellectuals equipped with a true personality in our society.

Konkuk University, which runs a variety of scholarship systems composed of 125 types of scholarships (including those from external scholarship foundations), provides a wide range of scholarship benefits for KU students so that they can venture into the unknown to make their dreams come true. In particular, the KU Global Leader Scholarship is a system that covers the entire costs of tuition for the next four years for students who achieve high scores on the College Scholastic Ability Test, and if they go to a graduate school, it also covers the entire costs of tuition in master’s and doctoral courses. This contributes to successfully attracting excellent students. Moreover, the Scholarship Counseling System is in operation for the purpose of supporting student-customized scholarships through counseling with each student.
Laying a foundation for practical convergence education
Konkuk has established optimized environments to improve its competence in research and education by extensively creating 22 educational and research facilities for the last 10 years. The New Engineering Building built with approximately 37 million USD has a gross floor area of 25,196 m² and has high-tech facilities comparable to any global university including the SMART Factory, which features a cutting-edge space for creative engineering education and practices. Moreover, this building has 23 seminar-type lecture rooms with state-of-the-art equipment—such as LED screens, electronic blackboards, and projectors—so that students can feel free to have a class discussion.

Comfortable and convenient surroundings
The surroundings of Konkuk University are recognized as one of Seoul’s representative culture streets along with Daehangno and Hongik University Entrance. Star City Street, which was created in 2007, forms a unique street culture in harmony with Konkuk University Food Street and Rodeo Street. In addition, Konkuk University Station, where Seoul Subway Lines 2 and 7 meet, features good accessibility to Gangnam, Gangbuk, and Gyeonggi-do, assuring students of convenient commuting environments. Also, thanks to the different amenities—including department stores and shopping malls, cinemas, and performance places—in the vicinity of Konkuk University, its surroundings are very popular with not only students but also the general public as the best business district.

Eco-friendly campus with a forest and a lake
With respect to the Konkuk Campus, benches and walking trails are unfolded along the broad lake, and the greensward and the trails of the dense forest present gorgeous landscapes all year around. Its flower garden that teems with various wildflowers and Ilgamho Lake that features the excellent preservation of natural ecosystems provide a beautiful and relaxing place for residents in its surrounding areas as well as KU students. An eco-friendly campus where humans and nature coexist is another pride of Konkuk University.

Konkuk, with a high-tech campus in nature, creates top-notch educational environments.
Konkuk’s campus boasts a beautiful nature, with an extensive forest and a lake stretching out, in conjunction with advanced facilities that have become stepping stones for increasing the capacity for research and education. The phenomenal and convenient campus where humans, nature, and high technology are in harmony is in the arms of Konkuk University.
210,000 KU alumni play a pivotal role across the world.

KU alumni are well known as upright, diligent and highly faithful in the society. Because of their character traits, similar to perseverance of the ox, they are actively working in the fields of politics, law and art and culture.
Convergence of Talent

College

- College of Liberal Arts
- College of Sciences
- College of Architecture
- College of Engineering
- College of Political Science
- College of Business Administration
- Konkuk Institute of Science and Technology (KIT)
- College of Sang-Huh Life Sciences
- College of Veterinary Medicine
- College of Art & Design
- College of Education
- College of Sang-Huh Liberal Arts
The College of Liberal Arts is intended to be oriented toward the fundamental exploration of humans and their lives. Unwaveringly defending this intent, we aggressively seek not only interdisciplinary communication and consilience with cognitive science, culture and arts, and media studies but also methods for a realistic/cultural contribution to cultural content, schooling, lifelong education, and the field arts. This is based on our faith that we need to return to enthusiasm and the basics toward pleasant humanities aiming at living happily together. To achieve that, we systematically cooperate with each department and, furthermore, form networks in many diverse quarters with the Humanities Research Institute, Institute of Body and Culture, Cultural Contents R&D Center, Epic and Literary Therapy Research Institute, Language Cognition Institute, The Centre for Middle Eastern Studies, Korea–Taiwan Comparative Sociology Institute, Research Institute of Creative Contents, KU Institute of Communication Studies, and more. Now, Konkuk’s humanities of excitement and communication are throbbing with life.

Creativity and artistic talent of persons are cultivated in the fertile soil of humanities.

The College of Science consists of the Department of Mathematics, School of Physics, and Department of Chemistry, which are the core of basic science. After attempting to characterize research by department/division and fuse them with other fields of science, we have successfully won large-scale research projects such as BK21, World Class University (WCU), NRL, BRL, Solar Cell Research Center, and SSK. The results of the research we carried out were published in top-notch journals including Science. The talented students fostered by professors at the College of Science based on such enthusiasm and efforts have entered every level of the domains in the society and have played a pivotal role as a driving force to increase the competitiveness of Korea’s basic science.

We embark on a new chapter in advanced science to expand the base of research.
The College of Architecture is designed to foster architecture professionals, not simply skilled engineers, in a wide range of fields needed in the society based on an abundance of experiences in humanities and liberal arts education. Since 2016, we have contributed to strengthening KU’s uniqueness by integrating detailed majors, architectural design, architectural engineering, and residential environment into the Department of Architecture; broadening the range of disciplines; and reinforcing their linkages. A part of KU’s outstanding assets are ascribed to its faculty who specialize in different majors, the comfortable environment of the independent Architecture Building, and the 4,500 graduates who are active in various fields of architecture.

Our priority is to deliver education about sustainable architecture and creation of a city environment.

The College of Engineering provides high-quality education through the New Engineering Building equipped with high-tech facilities. Moreover, we help students increase their competitiveness by developing the caliber of a chief technology officer (CTO) through a more consolidated accreditation of engineering education. In addition, we have fused NT/IT in the field of research; established support systems for brilliant research groups to secure original technologies in the eco-friendly/energy and materials fields, the key areas of the new growth engine industry; and laid the foundation for practical disciplines by attracting company R&D centers. In particular, we are evolving into a more powerful new growth engine for Korea’s future industry through an integration with the Division of Software Convergence. We also provide a more reinforced ICT curriculum and business-centered educational programs by offering ICT-related education and technical assistance.

We lead the future industry with our unparalleled materials and equipment, and excellent new technologies.
The purpose of the College of Social Sciences is to cultivate convergence talents equipped with comprehensive insights in response to the Fourth Industrial Revolution. To create a synergistic effect of the fusion of social sciences, we integrated the seven departments of three existing colleges: College of Politics, College of Commerce & Economics, and College of Global Integrated Studies. The bachelor’s curriculum includes new majors such as Political Science Major, Economics Major, Public Administration Major, International Trade Major, Applied Statistics Major, Interdisciplinary Studies Major, and Global Business Major. Each major is also operated as a degree course of the graduate school. As you are well aware, this is the era of convergence where AI-based software systems as well as voluminous and complex data are processed in an integrated manner. This society demands interdisciplinary talents with synthetic thinking ability. Based on this social demand, we at the College of Social Science explore the convergence disciplines of diverse majors to produce global professionals armed with global vision and a challenging spirit.

The purpose of the College of Business Administration is to cultivate global leaders armed with the knowledge, skills, values, and morality needed to assure national development and secure corporate competitiveness as well as to contribute to national advancement through research innovation. The faculty and students make utmost efforts to do so under the educational goals of globalization, practicality, leadership, and ethics. In addition, missions and a vision have been set up to be accredited by AACSB, which provides an internationally recognized accreditation, and infrastructure have been improved through the continued re-organization of curricula and the remodeling of the Management Building in accordance with newly established development strategies. Moreover, we do our best to provide world-class business administration education by increasing the levels of research and curricula through securing capable full-time professors and lecturers, which will serve as a foundation for cultivating brilliant future managers equipped with global competence.
We culture high-caliber talent in the field of life science by offering our quality bioscience courses.

Konkuk Institute of Technology, which was newly established to foster convergence technology-customized talents who can lead industrial change, consists of PRIME leading departments centered on biotechnology/bioengineering and convergence engineering fields. PRIME stands for Program for Industrial needs-Matched Education. These departments have relevance to such industries as leading-edge automobiles, intelligent robots, and wearable devices, the industrial demands of which are expected to increase in response to the Fourth Industrial Revolution. Konkuk University operates the 4 + 1 semester system, a bachelor’s-master’s course, which connects undergraduates with graduate schools for the purpose of nurturing professional workforce in those fields.

Sang-Huh College of Life Sciences was established to honor Dr. Yoo Seok-chang, the founder of Konkuk University, who made a great contribution to the agricultural, forestry, and livestock industries and life science in Korea. Composed of 7 departments with 50 full-time professors, it has achieved educational innovation as Korea’s largest college of life science. Sang-Huh College of Life Sciences deals with an extensive coverage of life science in terms of its depth and width. Specifically, it handles DNA that carries genetic instructions to organisms in terms of its depth, and covers animals and plants, microorganisms, food distribution and food resources, environmental health and forestry, and landscape architecture in terms of its width. Through these, it is opening a new chapter in unprecedented convergence-based academic studies that range from basic science to applied science to industrialization.
College of Veterinary Medicine

The College of Veterinary Medicine began as the Department of Veterinary Medicine, College of Animal Husbandry, and elevated as a college in 1998. Its focus is on education, research, and service for the health and welfare of mankind and animals. Based on this, it provides a systematic and in-depth curriculum composed of theories, experimental practices, clinical practices, and placements in conjunction with graduate education. Our students can deepen their knowledge of basic, preventive, and clinical veterinary medicine through these systematic learning courses, and can acquire the latest knowledge using advanced materials and equipment, and medical devices. In particular, along with our faculty members, who are top-notch leaders in each discipline, we offer high-quality education and cultivate not only future clinical veterinarians qualified to treat pets and industrial animals but also professional veterinarians involved in the fields of life science such as basic medicine, pharmacy, public health engineering, epidemiology, pathology, and laboratory animal medicine. In addition, aiming at nurturing 21st-century persons of talent in response to the era of globalization, we also provide graduation education by discipline to produce prospective professionals in a variety of fields, thus making a contribution to the nation and the human society.

We support promising artists and designers in developing their creativity along with self-improvement.

College of Art and Design

The College of Art & Design features the study of art and design, and consists of the Department of Communication Design, Department of Industrial Design, Department of Apparel Design, Department of Living Design, Department of Contemporary Arts, and Department of Image and Film. We aim to foster capable artists and designers who can take a leading role in rapidly advancing and changing societies. To respond to social change and demand, we allow students to appropriately learn theories and practices in a learning environment equipped with cutting-edge materials and equipment as well as provide more future-oriented educational programs.

We contribute to the people around the world by nurturing professional clinicians, researchers and quarantine veterinarians possessing skills needed in the 21st century.
College of Education

The College of Education, which was established to foster outstanding secondary school teachers who are erudite and good at teaching, has made a great contribution to the development of Korean education by producing 6,000 excellent teachers until now. We have ranked the highest in terms of the number of students who passed the teacher certification examination, which is a positive evidence that we play a leading role as a teacher training institute. Currently, 700 students major in Japanese education, mathematics education, physical education, music education, education technology, and English education. They strive to realize their dream of becoming educationalists under the guidance of our faculty members who have a wide range of erudition and the capability of teaching. Our students will be reborn as brilliant educationalists who can develop their academic and educational abilities, understand school settings and schooling, and love their pupils.

College of Sang-Huh Liberal Arts

Sang-Huh College is an organization dedicated to liberal arts education for undergraduates. It aims to enhance the quality of education by renovating undergraduate education, strengthening liberal arts education, developing students of talent, and expanding career programs. Konkuk University has drastically reorganized the liberal arts curriculum to cultivate talents who feature creativity, the right personality, global citizenship, and synthetic thinking. Our students can enhance their convergence capacity through the programs of liberal arts education designed to allow students to attend lectures on Chinese/English, employment/start-up, software, and others, and to strengthen the knowledge of liberal arts as well as the capabilities of reading and writing creatively, and speaking foreign languages.

We foster secondary school teachers who will lead the knowledge-based society.

We increase KU’s academic standards through diverse liberal arts programs tailored to the needs of this age.
Our efforts to broaden the horizons of human intelligence are based on a purely inquisitive spirit.

Graduate Schools

Humanities and Social Sciences
Department of Korean Language & Literature, Department of English Language & Literature, Department of Japanese Culture & Language, Department of Chinese–Korean Comparative Language & Literature, Department of Philosophy, Department of History, Department of Education, Department of Educational Technology, Department of Political Science, Department of Law, Department of Public Administration, Department of Economics, Department of Business Administration, Department of Business Intelligence, Department of Management of Technology, Department of International Trade (International Commercial Transactions Major), Department of International Commerce Business, Department of Applied Statistics, Department of Livestock Management and Marketing Economics, Department of Real Estate Science, Department of Consumer Information Science, and Department of Advanced Industry Fusion

Natural Sciences
Department of Biological Sciences, Department of Chemistry, Department of Physics, Department of Geography, Department of Mathematics, Department of Stem Cell Regenerative Biotechnology, Department of Bioindustrial Technology, Department of Animal Science and Technology, Department of Food Science and Biotechnology of Animal Resources, Department of Crop Science, Department of Biore sources and Food Science, Department of Biotechnology, Department of Mathematics Education, Department of Clothing (Textile Design Major), Department of Biomedical Science and Technology, Department of Advanced Translational Medicine, Department of Forestry and Landscape Architecture, and Department of Environmental Health Sciences

Engineering
Department of Chemical Engineering; Department of Industrial Engineering; Department of Electrical Engineering; Department of Electronic, Information and Communication Engineering; Department of Organic & Nano System Engineering; Department of Architecture; Department of Civil Engineering; Department of Biological Engineering (Cosmetic Biology Science Major); Department of Mechanical Engineering; Department of Environmental Engineering; Department of Computer / Information and Communication Engineering; Department of Materials Chemistry & Engineering; Department of Machine Design; Department of Aerospace Information Engineering; Department of Civil & Environmental Plant Engineering; Department of Technologies Fusion Engineering (BT Fusion Major); Department of Software; Department of IT Convergence Information Protection; Department of Smart Vehicle Engineering; Department of Cosmetics Engineering; Department of Biomedical Science and Engineering; and Department of Energy

Arts and Physical Education
Department of Music, Department of Design, Department of Arts and Crafts, Department of Physical Education, Department of Contemporary Art, and Department of Moving Image

Medicine
Department of Medicine and Department of Veterinary Medicine
We seek balance between on-the-job experiences and expertise.

Professional Graduate Schools

Graduate School of Public Administration
Department of Policy/Governance (General Administration Major, Policy Science Major, Local Administration Major, and Public Disaster Management Major), Department of Social Welfare (Social Welfare Major and Infant Care Major), Department of Taxation / Public Administration (Taxation / Public Administration Major, Taxation/Accounting Major, and Taxation Policy Major), Department of National Intelligence Studies (Information Science Major and Political Leadership Major), Department of Legal Affairs (Legal Affairs Major and SME Law Major), and Department of Urban and Regional Planning (Urban and Regional Planning Major, and Urban Culture and Arts Content Major)

Graduate School of Education
Department of Education (Pedagogy Major, Educational Administration Major, Creativity and Gifted Education Major, and Sports Teaching Education Major), Department of Curriculum and Instruction (Korean Education Major, English Education Major, Japanese Education Major, Mathematics Education Major, Physics Education Major, History Education Major, Physical Education Major, Music Education Major, Fine Arts Education Major, Information and Computer Education Major, Nutrition Education Major, and Beauty Education Major), Department of Counseling Psychology Education Major, Learning Consulting Major, Career Guidance (Minor), and Multicultural Communication Education Major, and Department of Early Childhood Education (Early Childhood Education Major)

Graduate School of Engineering
Department of Architectural Engineering (Architectural Planning and Design Major, Architectural Structure Major, and Building Materials and Construction Major), Department of Biological Engineering (Biological Engineering Major, Fermentative Production and Food Major, and Zymology Major), Department of Cosmetic Science (Cosmetic Biology Science Major), Department of Defense Acquisition (Defense Acquisition Major), Department of Golf Industry (Professional Golfer Coaching Major and Golf Course Management Major), Department of Convergent Medical Physics (Convergent Medical Physics Major), and Department of Animal-Assisted Therapy (Animal-Assisted Therapy Major and Horticultural Therapy Major)

Graduate School of Agriculture and Animal Science
Department of Life Resources (Life Resources Major), Department of Biofood Engineering (Biofood Engineering Major), Department of Animal Science (Animal Science Major), Department of Meat Industrial Engineering (Meat Industrial Engineering Major), Department of Food Marketing Economics (Food Marketing Economics Major), Department of Applied Veterinary Medicine (Applied Veterinary Medicine Major), Department of Biological Engineering (Biological Engineering Major), Department of Forestry and Landscape Architecture (Forestry and Landscape Architecture Major), and Department of Animal-Assisted Therapy (Animal-Assisted Therapy Major and Horticultural Therapy Major)

Graduate School of Mass Communication & Public Relations
Department of Digital Journalism (Convergence Journalism Major and Digital Publication/Magazine Major), Department of Broadcasting and Communications Convergence (Broadcasting Image and Communications Major, and Broadcast Hosting / Speech Major), and Department of Advertising and Public Relations (Advertising / Public Relations Major and Performing Arts Major)

Graduate School of Real Estate Studies
Real Estate Business Management Major, Real Estate Construction and Development Major, Real Estate Financial Investment Major, and Global Real Estate Major

Graduate School of Information and Telecommunications
Department of Information Security (Finance IT Major and Information Security Major), and Department of Convergence Information Technology (IoT Major and IT Audit Review/ Evaluation/Certification Major)

Graduate School of Art & Design
Fashion Design Major, Fashion Marketing Major, Visual Information Design Major, Interior Design Major, Beauty Design Major, Art Therapy Major, Film Acting Major, and Performing Arts Major
We foster talent having considerable expertise by providing in-depth and creative education.

Professional Graduate Schools

Graduate School of Architecture
The Graduate School of Architecture features its two- and three-year curricula, which focus on a specialized architectural design for students with degrees in architecture or interior architecture, as well as for those with backgrounds in other disciplines. Through this program, students can have an opportunity to take academic and professional training courses that comply with international standards. Moreover, our “4 + 2” program combines four-year undergraduate coursework with two-year graduate level studies, giving students more advantages than the five-year architectural program. We at the Graduate School of Architecture ensure that our program thrives on enrichment, diversity, and adaptability, aiming to nurture and produce architectural professionals equipped with both the synthetic cognition of different physical environments and professional business skills.

Konkuk Law School
To specialize in laws in relation to real estate, Konkuk Law School focuses on cultivating people of talent who have advanced professional knowledge of legal affairs related to real estate subject to global investment and legal regulations. In addition, we educate students on a wide range of knowledge in conjunction with legal business such as legal affairs for companies, general litigation, and legal advice. Including 10 professors who served as judges, prosecutors, and lawyers, our faculty members, who retain outstanding research achievements, not only teach legal knowledge but also concentrate on the development of abilities to holistically understand law and order as well as resolve problems. Furthermore, they are devoted to building up new knowledge that is appropriate for the era of globalization and informatization.

KU MBA
(Master of Business Administration)
Based on its unique curriculum that can apply to the rapidly changing global management environment, KU MBA is designed to cultivate brilliant prospective executives who can contribute to strengthening the competitiveness of companies and public organizations. It operates five intensive courses centered on three programs: Konkuk MBA, Pioneer MBA, and Arts and Culture MBA. Through these courses, our students acquire knowledge concerning history, humanities, sociology, and culture. Consequently, they can develop the quality of an executive who highly regards humans and the society.

Graduate School of Medicine
The Graduate School of Medicine was first established as the College of Medicine in 1986 for the purpose of inheriting and developing the noble volition of the late Dr. Yoo Seok-chang, the founder of Konkuk University, called Guryojemin that means providing decent medical care to unprivileged people. In August 2005, it was changed into the Graduate School of Medicine. In August of that year, Konkuk University Medical Center, which has 870 sickbeds, opened. Since then, all the members involved have been devoted to the dramatic development of the center, aiming to establish a second center. We at the Graduate School of Medicine have produced top-notch doctors and medical scientists who will lead domestic and global medical worlds, under the goal of selecting capable people in different fields to foster considerate, creative, and competent doctors with leadership.
Our library serves as the storehouse of knowledge and wisdom.

**Library**

**Sanghuh Memorial Library**
Launched as a new library in March 1989, Sanghuh Memorial Library has one basement level and six stories above the ground, featuring a building area of 1,300 pyeong with a gross floor area of 7,000 pyeong. It houses a collection of more than 1 million books and consists of 6 reading rooms, study rooms only for laptop computer users, rooms only for students who are preparing for national examinations, a student lounge, and more.

**KU Law Library**
The KU Law Library opened in August 2006. It has one basement level and five stories above the ground with a gross floor area of 7,055 m², featuring a capacity for housing 150,000 books and seating 336 people. Currently, it has a collection of 66,000 books and aims to become Korea’s top library in terms of law-related materials by possessing 150,000 books in the future.

**Konkuk University Museum**
Konkuk University Museum displays Korean artifacts. Today, its collection includes more than 5,300 items including not only prehistoric artifacts from the Paleolithic Age to the Early Iron Age but also earthenware, ceramics, wooden and metal crafts, paintings, books, and papadams that date from the Three Kingdoms of Korea to the Joseon Dynasty. In addition, articles left by the late Dr. Yoo Seok-chang and KU history materials are on display.

**University Press**
The University Press is responsible for publishing textbooks, educational books, journals, and professors’ writings. In addition, it has proceeded with the project for publishing academic literature. Furthermore, it was awarded because of a series of “Understanding and Appreciation of Literature” at the Korea Book Awards established by Hankook Ilbo.

**KUL House**
KUL House is Korea’s largest high-tech dormitory that features 1 basement level and 12 stories above the ground, consisting of 5 buildings that can house 3,070 students. It has cutting-edge lecture rooms, seminar rooms, and operates the dormitory scholarship system, language classes, PE classes, and others.

**Iuhan**
The High Civil Service Examination Study Hall called Iuhan is a seat of learning that was designed to provide space for research as well as a room and board for undergraduates and graduates who are prepared for the Highest Civil Service and Public Administration Examinations, the CPA examination, and technology examinations. It has research rooms and the latest books. Capable professors and successful examinees deliver special lectures, and a mock test is carried out every month to measure the possibility of passing the examinations.

**KU Media**
Konkuk University Media consists of the Konkuk University Newspaper, which aims to report news that occurs inside and outside the campus promptly and accurately, Konkuk’s English newspaper, which is intended to improve English skills and create university culture through English; and Konkuk’s Academic Broadcasting System (ABS), which provides audio broadcasts daily from Monday to Friday as well as video programs on the Internet.

**KU Veterinary Medical Teaching Hospital**
Since its opening in 1958, KU Veterinary Medical Teaching Hospital has pioneered new fields of veterinary medicine centered on pet animals. It not only cultivates able veterinarians but also aims at becoming a veterinary hospital oriented toward the welfare of pet animals and their protectors, based on the noble volition of the late Dr. Yoo Seok-chang—the founder of Konkuk University—called Guryojemin that means providing decent medical care to unprivileged people. To cure diseases that are difficult for regional animal clinics to treat, we have continued to develop and distribute new technology along with ceaseless research. To meet the request of a great number of regional hospitals, the night emergency center opened in October 2016.

**Konkuk Language Institute**
The purpose of the Konkuk Language Institute is to secure educational data for foreign language education and audiovisual teaching, and to develop and educate practical education programs to help students learn spoken English, secure new jobs after graduation, and study abroad.

**Continuing Education Center**
The Continuing Education Center is dedicated to promoting comprehensive education and training policies to develop lifelong learning and career ability by selecting specialized fields by demand. In addition, it makes a big contribution to increasing the quality of Korea’s lifelong learning through programs that connect employment, start-up, and reeducation by means of a variety of adult education and training.

**Institute for Innovative Education**
The Institute for Innovative Education, which aims to implement a leading innovative model of educating school parents, has strived to develop spreadable innovative systems for educating school parents. To create world-class, high-quality parent education, we make efforts to manage the quality of education by establishing project strategies for the organization, workforce, budget, and systems.
We strengthen the competitiveness of KU by enhancing the value of education and research capability.

Research Institutes

Research Support Centers
- Institute of Biomedical Science and Technology
- Institute of Ubiquitous Information Technology and Application (UITA), Humanities Research Institute, and KU Institute for International Development Cooperation

KU Affiliate Institutions
- Institute for Business and Economic Research, The Education Research Institute, Animal Resources Research Center, The Institute of Legal Studies, The Research of Social Science, The Academy of Applied Science and Technology, Research Institute of Life and Environment, and Veterinary Science Research Institute

Special Research Institutes
- The Institute for the 3Rs, Institute of KU Biotechnology, KU Institute of Communication Studies, Physical Activity and Performance Institute (PAPI), Institute of SK-KU Biomaterials, Social Eco-Tech Institute (SETI), Institute for Advanced Physics, Public Design Research Center, Research Institute for Molecular-Targeted Drugs, Institute of Educational Technology, Center for International Climate and Environmental Research, Research Institute for Global Management of Technology and Innovation for Catching Up, Global Agricultural Development Cooperation Center, Research Center for Livestock Industry of North Korea, Center for Molecular Control of Nervous System, Big Data Research Institute, Biological Active Metabolite Network Institute, Bimolecular Informatics Center, The Institute for Ecology-Based Society, Epic and Literary Therapy Research Institute, Software and Security Research Center, Institute of Mathematical Sciences, Institute for Smart Green Architecture + Urbanism, Research Institute for Meat Science and Culture (RMSC), Food Biotechnology Research Institute, Center for One Health, Center for Emerging Market Global Companies, The Center for Asia and Diaspora, Asia Infrastructure Research Center, Asia Contents Institute, Security and Disaster Safety Convergence Institute, Cancer and Metabolism Institute, Liquid Crystals Research Center, Quantum Institute for Emerging Technologies, Ecoinformatics Research Center, Flexible Display Roll-to-Roll Research Center, Konkuk University Music Education Research, Migration and Social-Integration Research Center, Artificial Muscle Research Center, Natural Science Farming Research Institute, Research Center for Innovation

KU Climate Research Institute, Center for AgriFood Safety Certification, Agm-Livestock Talent Development Institute, The Konkuk Research Institute for Multilingualism and Multiculturalism, Monogastric Animal Feed Research Institute, Research Institute of Urban Administration, Research Institute of Real Estate and Urban Studies, Research Center for Livestock Industry of North Korea, Center for Molecular Control of Nervous System, Big Data Research Institute, Biological Active Metabolite Network Institute, Bimolecular Informatics Center, The Institute for Ecology-Based Society, Epic and Literary Therapy Research Institute, Software and Security Research Center, Institute of Mathematical Sciences, Institute for Smart Green Architecture + Urbanism, Research Institute for Meat Science and Culture (RMSC), Food Biotechnology Research Institute, Center for One Health, Center for Emerging Market Global Companies, The Center for Asia and Diaspora, Asia Infrastructure Research Center, Asia Contents Institute, Security and Disaster Safety Convergence Institute, Cancer and Metabolism Institute, Liquid Crystals Research Center, Quantum Institute for Emerging Technologies, Ecoinformatics Research Center, Flexible Display Roll-to-Roll Research Center, Konkuk University Music Education Research, Migration and Social-Integration Research Center, Artificial Muscle Research Center, Natural Science Farming Research Institute, Research Center for Innovation

Electricity Market Technology, The Centre for Middle Eastern Studies, Research Institute for Molecular-Targeted Drugs, Center for Emerging Wireless Transmission Technology, Institute of Livestock Business Management (ILBM), Livestock Export Institute, The Academy of Korea Horse Industry (TAHK), Korea Hemp Institute, Konkuk Aerospace Design / Airworthiness Research Institute, Institute of Public Affairs, Coupled Human and Natural Systems, Human and Eco Care Center (HECC), and KU China Institute

President-Designated Institute
- KU Institute for Publicness Studies, Institute of Body and Culture, Humanized Pig Research Center
A history of leadership

We at Konkuk University are progressing toward “Konkuk’s Centennial” by innovating education and overcoming challenges based on the virtues of Sincerity, Fidelity and Righteousness which we have been cherishing over the last 86 years.

Konkuk University is on the right track toward its grand vision of becoming “One of the Top 5 Private Universities in Korea and One of the Top 100 Universities in Asia”. We would like to ask for your attention and support.
